Managing Street Trees:
What You Should Know For Success

Trees do more than make streets look attractive. They improve air and water quality, moderate air temperatures, attenuate traffic noise and stormwater runoff, increase property values and improve public safety through the reduction of solar glare. This workshop will focus on the selection of appropriate street trees and discuss insects, diseases and other environmental factors and how their influence and impacts on trees can be managed and controlled.

Thursday, December 15, 2016
Westchester County Center
198 Central Avenue, White Plains
